

Horizontal Cable Management

Brush Strip Panels are used to allow the passage of patch leads from the front of a cabinet to the rear whilst maintaining a neat appearance and reducing front to back air flow. Blank Panels are used to neatly fill spare cabinet space and maintain correct air-flow. Dump Panels are a convenient way to store excess patch lead length.

Features & Benefits

- Makes installations neater and more professional
- Finished in black to match panels
- Patch lead management
- Air flow management
